CARBYN

Turn shop-floor work into training & work instructions

Save engineering time.
Help operators get up to speed.

October 2026

CARBYN

Work instructions take too much engineering time

97% of manufacturers surveyed were concerned about knowledge loss.

Source: Manufacturing Institute, 2019. Figure 2, n=289.

01

Engineering time

Documenting each operation takes engineers away from other work.

02

Repeat training

Turnover and multiple shifts mean the same explanations happen again.

03

Work context

Without a recording, the details behind an instruction are harder to revisit.

CARBYN

Keep your hands on the job.

Talk to Carbyn through safety glasses. Get guidance, report repairs and capture what worked while you keep working.

META Z87+ SAFETY GLASSES
Voice + first-person video

01 · Ask by voice → 02 · Get help in context → 03 · Capture the outcome

CARBYN

Say it once. Turn field work into a work order.

“There’s a leak around the bearing.
Create a follow-up work order
and request a seal kit.”

Voice + photo → Structured draft → Technician review

Break-in repairs become visible, trackable work.

EXAMPLE WORK ORDER · #2487 — Draft for review

Inspect and repair bearing leak

ASSET	Conveyor N-2
PARTS REQUESTED	Seal kit · Qty 1
EVIDENCE	Bearing photo + voice description
NEXT ACTION	Review and assign in your CMMS

CMMS WORKFLOW — MaintainX · Limb · Rockwell Automation · Fiix

CARBYN

Help at the machine. Knowledge for the next shift.

01 **Show the issue**

First-person video captures what the technician sees.

02 **Ask for the next step**

Retrieve the relevant procedure and talk through the work.

03 **Resolve and retain**

Record findings and repairs. Escalate with visual context when needed.

Fewer avoidable troubleshooting trips.

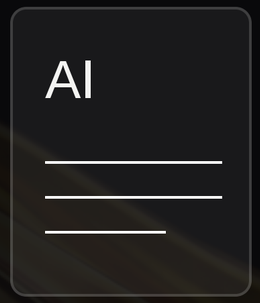

Repair → Review → Reusable knowledge

CARBYN

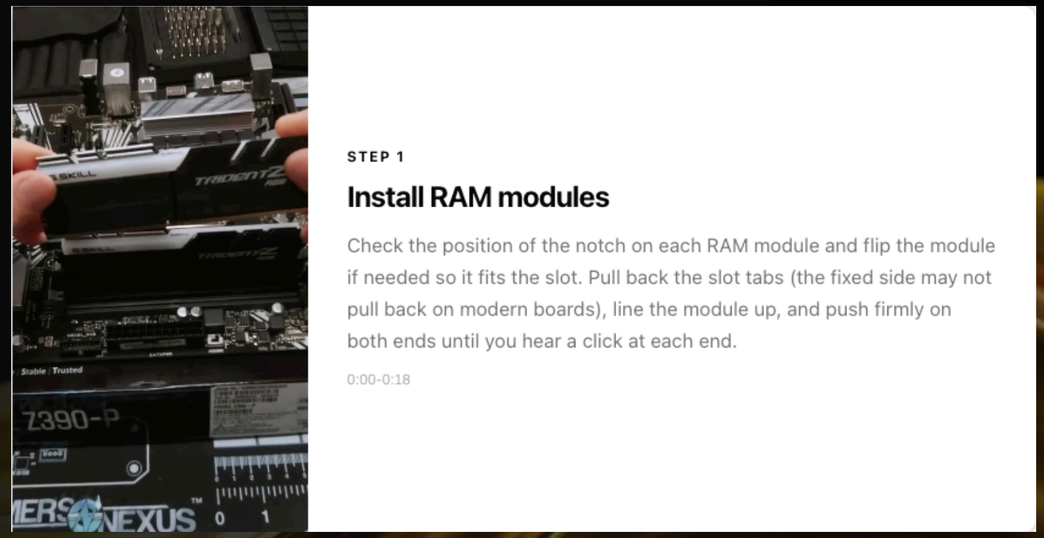

From hands-on work to work instructions

CARBYN

What changes when the work writes itself

No after-hours paperwork. Faster onboarding. Expertise that stays on the floor.

3 yr → 6 mo

Faster operator ramp

60% faster onboarding with AI-guided SOPs from senior captures.

0 min

After-hours paperwork

Hit record and do the job. Work orders and reports write themselves.

-40%

Callbacks and rework

Real-time spec checks and visual proof before the job closes.

WHO	TODAY (WITHOUT CARBYN)	WITH CARBYN
The Technician	1 to 2 hours of nightly data entry; paper SOPs nobody reads	Hands-free guidance on the job; prove every step on video
The Supervisor	Chasing updates across 5 to 8 disconnected systems	See the work as it happens; stop guessing, start managing
The Plant & Exec	Senior retires and 30 years of tribal knowledge walks out	Searchable, versioned SOPs and audit-ready ERP/CMMS records
