CARBYN

Faster line changeovers. Hands-free floor SOPs.

Built for Rustic Bakery's 50,000 sq ft Petaluma plant.
Two floor-ready tracks for maintenance and line crews:

META Z87+ SAFETY GLASSES
Ovens, sheeters & baggers
Hands-free voice + POV capture

01 · Bakery Line Bottlenecks → 02 · Voice Work Orders & EN/ES SOPs → 03 · Petaluma 4-Week Pilot

CARBYN

Where line uptime and batch consistency get lost.

Across fermented sourdough crackers, flatbreads, and seasonal cookie runs in Petaluma:

01 · SKU CHANGEOVERS & SETUPS

Setup Drift

Sheeter, oven & packaging setups

Switching from sourdough flatbreads to seasonal cookies relies on veteran memory, causing scrap and startup delays.

With Carbyn → Step-by-step POV setup checklists

02 · UNRECORDED FLOOR REPAIRS

Paper Notes

Missing PM & repair history

Techs fix a bagger jam or conveyor bearing on the floor, but root-cause notes and parts never reach the asset log.

With Carbyn → Speak on the floor, work order logged

03 · BILINGUAL FLOOR TRAINING

EN ↔ ES

Cross-shift operator onboarding

Static binders go unread across shifts. New operators shadow leads for weeks to learn sanitation and QA steps.

With Carbyn → 1-take video to English & Spanish SOPs

CARBYN

Say it once on the line. Work orders write themselves.

“Grease leak on Sheeter Line 2 drive bearing.
Create a follow-up work order and request a food-grade seal kit.”

PETALUMA MAINTENANCE · WO #2487 Ready for review

Inspect & replace Sheeter Line 2 drive seal

ASSET	Petaluma Line 2 · Dough Sheeter S-02
PARTS REQUESTED	Food-grade bearing seal kit · Qty 1
EVIDENCE	Bearing photo + voice diagnostic note
NEXT ACTION	Assign to next planned sanitation window

Voice + photo on the floor → Structured work order → Manager review
Zero greasy gloves on keyboards after the shift.

CMMS WORKFLOW MaintainX Limb Rockwell Automation Fiix

CARBYN

Record one changeover. Train every shift in English & Spanish.

01 **Capture the best lead once**

Your lead tech wears glasses during one real sheeter setup, bagger adjustment, or allergen washdown.

02 **Auto-build bilingual SOPs**

Carbyn turns the recording into step-by-step visual cards and audio in English and Spanish.

03 **Guided execution at the machine**

Operators verify preflight settings hands-free by voice or tablet right next to the line.

Consistent setups across all shifts.

1 Capture → Review → English & Spanish SOP

CARBYN

4-week floor pilot on 1 priority line in Petaluma.

01 Scope: Pick 1 target line (sheeter, oven, or packaging) + 3–5 core changeover & PM SOPs.

02 Hardware: 2 Meta Z87+ safety glasses + shared line iPad/mobile app (zero IT lift).

03 Success KPIs: Changeover time, first-pass batch yield, and bilingual operator ramp speed.
